GRIFFING NURSERIES

BEAUMONT, TEXAS

1946 WHOLESALE PRICE LIST

"Serving The Southwest for Over 60 Years"

"IT IS A HOME WHEN IT IS PLANTED"

**BUY AT GRIFFINGS FOR SATISFYING
RESULTS IN LANDSCAPE PLANTINGS!**

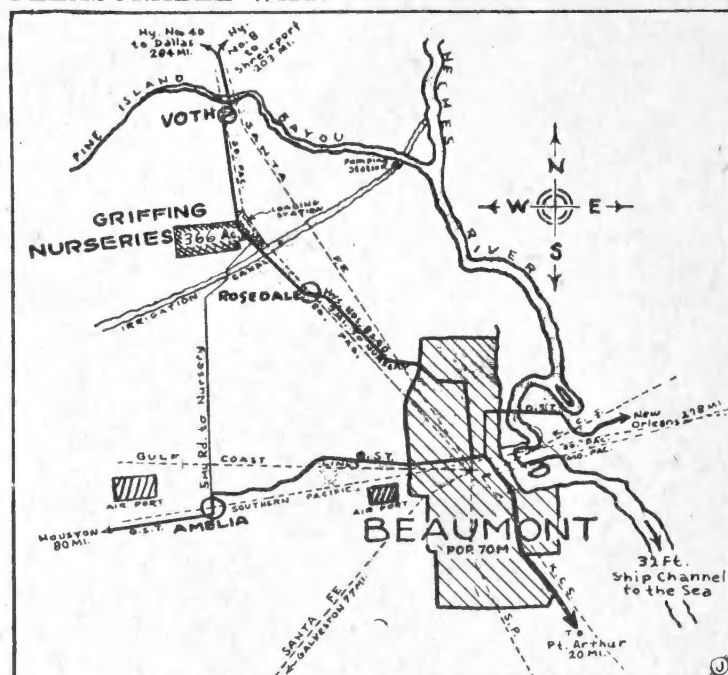

AN INVITATION TO VISIT OUR NURSERIES

Visitors are always welcome at our Nurseries. Griffing's Organization takes A KEEN DELIGHT in showing the visitor over the 300 ACRES of Evergreens and Shrubs. If you are experienced in Plant

Culture you WILL ENJOY seeing the splendid assortment of Trees, Shrubs, Evergreens, Fruits, etc., at Griffing's, while an amateur WILL LEARN something of Garden Planning in an interesting and PLEASURABLE WAY.

"Where the great East Texas meets the Sea." A network of Highways and Railroads, giving efficient transportation everywhere.

Located on U. S. Highways 96 and 69. Note the short cut-off from Amelia when coming from the West which saves several miles.

TERMS OF BUSINESS

PRICE LIST FOR TRADE ONLY

This Price List supercedes and cancels all outstanding prices. Prices and Terms of Sale are subject to change without notice.

This Catalog is intended for members of the Trade (Nurserymen, Landscape men, Dealers, Florists) who buy for resale plant materials. Should it fall into the hands of a Retail customer, it will be appreciated if it is returned directly to us.

TERMS AND DISCOUNTS: Cash in advance, unless satisfactory arrangement is made before shipment. Five percent (5%) will be allowed for Cash if remittance accompanies order. Two percent (2%) discount will be allowed for open accounts if paid within 10 days from date of delivery. Thirty (30) days net on List prices. Six percent (6%) interest will be added on overdue accounts, and subject to "Sight Draft".

PACKING: Where stock is loaded in car or truck, without tops wrapped, no charge for packing is made. Where L. C. L. or Express shipments require baling, boxing or crating, we make a charge for material and labor at cost.

SPECIMEN NURSERY STOCK: Specimen Stock above XX and XXX Quality, selected or marked in the Nurseries, will be priced according to its value.

RESERVE ORDERS: Reserve orders are accepted upon payment of 25% advance, and upon the condition that they shall be void, should injury befall the stock, or error in count before shipment, or other causes beyond our control.

GUARANTEE: We guarantee our Stock to be well grown, true to name, properly packed and shipped according to instructions. In no case shall our liability be more than the original Invoice value. We cannot guarantee plants to live or grow after they leave our hands.

CLAIMS: Complaints properly presented will be given special attention. Any claims must be made upon receipt of shipment, or within five (5) days. Be sure to have exceptions for damages noted on Transportation receipt at time of delivery.

SHIPPING POINT: All prices are f. o. b. our Nurseries, and Shipments travel at the risk and expense of the Purchaser. We load trucks and Carloads at our Nurseries. Carload shipments billed from Mt. Evergreen, or Gilburg, Texas siding, adjoining our fields. Express and Less Carloads shipped from Beaumont, Texas.

TRANSPORTATION INFORMATION

L. C. L. or MOTOR FREIGHT takes fourth Class, whether packed in Bales, Boxes or Crates to any point in the Southwest.

FREIGHT RATES LOWERED: There is now a New B&B Carload Freight Classification effective in all States included in the Southwestern Shipping Areas (including all the States of Texas, Arkansas, Louisiana and New Mexico; and portions of Mississippi, Alabama, Missouri and Tennessee) and possibly points beyond these limitations where the new freight rates are now in effect for this B&B Classification.

B&B CARLOAD RATES in the above Territory applies to 18,000 lb. Minimum Carloads which takes Column No. 25; and on 30,000 lb. minimum Carloads, takes Column No. 20 rate (20 per cent of First Class).

EXAMPLES OF LOW CARLOAD RATES effective to various Cities as follows: (Column No. 20 or 30,000-lb. Minimum Carload quoted). From our Shipping Point to:

Amarillo, Texas	44c	Laredo, Texas	36c
Albuquerque, N. M.	53c	Little Rock, Arkansas ..	35c
Baton Rouge, La.	24c	Memphis, Tennessee	39c
Corpus Christi, Texas	30c	Monroe, Louisiana	28c
Dallas, Texas	29c	Natchez, Mississippi	28c
El Paso, Texas	53c	New Orleans, Louisiana ..	28c
Enid, Okla.	43c	Oklahoma City, Okla.	39c
Fort Worth, Texas	30c	San Antonio, Texas	29c
Galveston, Texas	16c	Shreveport, Louisiana	25c
Harlingen, Texas	36c	Tyler, Texas	24c
Houston, Texas	17c	Waco, Texas	27c
Jonesboro, Arkansas	40c	Vicksburg, Mississippi	31c

For other points in this territory, ask Local Freight Agent the Rates from Gilburg, Texas, Mt. Evergreen, Texas, to your City; or write us direct for it.

WIRING BALLS ON SPECIMENS

On Trees and Shrubs dug B&B where larger than a 24 inch Ball is required to handle the plant, we recommend wiring the balls as a safety measure or extra precaution for handling.

To properly Wire the Balls, we recommend that 26 to 30 inch Hog Wire fence be securely wrapped around the Balls after they are dug and burlapped. Where we ball and deliver quantities of Live Oaks and other Specimens in Trees and Shrubbery without wiring, we consider the wiring a further precaution and a good investment for the Customer. Price for wiring Trees and Shrubs is given elsewhere in this Catalog.

SPECIAL MESSAGE TO *The Trade:*

Dear Friends and Customers,

PEACE is with us again, for which we are most thankful! It has been a LONG HARD FIGHT, for the ones in the Armed Forces, and for us at home, but we are Americans and keep on until we win. As the Nation again turns to Peace time conditions, let's hope that the renewed interest in Homes will be forthcoming, and the building of more AND BETTER HOMES for the future!

Conditions now change from Wartime conditions to that of reconversion to Peace time conditions, and with it comes a TRANSITION from HIGH LEVELS down to a normalcy that we can expect to continue. For a while we may expect some uncertain conditions to prevail, but after our Service men return home, labor is available for civilian use, supplies for building are available, and other equipment we will note the change in normal business once more. By late Fall or early Spring you will need lots of Plant Materials for GENERAL LANDSCAPE plantings, and there seems to be no big surplus of most Trees and Shrubbery in good quality on the market today.

Our Stocks of Trees and Shrubbery are still quite complete, despite the lack of new plantings during War times, and what we do have is of excellent Quality; and prices will be pretty much the same this year despite the higher labor we have paid for growing it and general care and cultivation. This policy we believe is best, as we want to encourage the public to CONTINUE LANDSCAPING, rather than stop because of prices being too high. Fruit Trees and Roses are scarce and too high to offer to our Wholesale Trade this year, as we only handle these under contract and have no control over prices. Our Landscape material is offered to our customers therefore in our usual good Quality way of handling, and we aim to render the same efficient and prompt service to our Customers in the future.

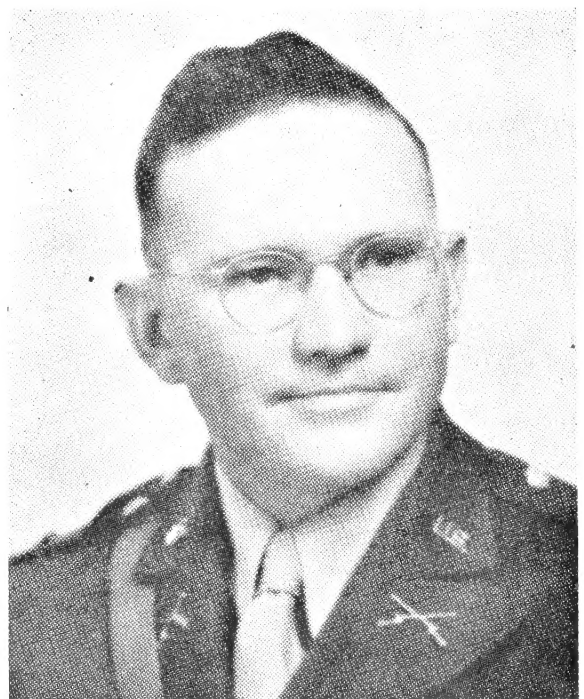

We wish to thank all of our many Hundreds of Customers for the business entrusted to us for them in the past, and on these same merits of furnishing good Quality Nursery Stock, properly grown and prepared for transplanting, we solicit your orders for the Current Season.

PRESENT MANAGEMENT

W. C. Griffing, who has been AT THE HEAD of Griffing Nurseries SINCE ITS BEGINNING, is proud to have ASSOCIATED with him his son Lieut. Ralph C. Griffing, since his graduation from Texas A. & M. College, in 1930 and now just returned home from 4 years service in U. S. Army and 18 months overseas, and it is THEIR INTENTION to carry on the Nursery Business THE GRIFFING WAY, symbolizing Quality Nursery Stock, and satisfied customers.

WALTER C. GRIFFING, Father

LIEUT. RALPH C. GRIFFING, Son

THE GRIFFING STORY

With a love of GARDENING INSTILLED by STURDY WELSH PARENTS, rich in old world lore, the Griffings have, for more than HALF A CENTURY, devoted their energies to seeking NEW VARIETIES, improving old favorites, and distributing among their EVER WIDENING circles of CUSTOMER-FRIENDS, plants that will add to the beauty and livableness of the Southern Home.

Thus was the beginning of the present Organization, which CONTINUES TO SERVE YOU. For adequate irrigation facilities, land was secured FIVE MILES NORTHWEST OF BEAUMONT, where the present OFFICES ARE LOCATED, where we have plenty of CHOICE BEAUMONT BALLING SOIL for growing Nursery Stock, and PRIVATE SIDE TRACKS for loading.

QUANTITIES OF BROADLEAF

For many years we have specialized in the production of BROAD-LEAF and Coniferous EVERGREENS, probably producing more

of these classes than any other SOUTHERN NURSERY. We have been able to determine the most hardy and SUITABLE VARIETIES for this section, and on these we have concentrated our MAIN EFFORTS, that our large 300 ACRE NURSERY yield an abundance of these plants to meet the ever increasing demand.

BUY WITH CONFIDENCE!

Our Customers are always welcome to visit our Nurseries and make their selections in person, but they do not have to do this in order to get good selections of Landscape materials. Old customers have found this true and it saves them time and worry by ordering stock of standardized quality and let us make the selections.

With curtailed travel and limited time for personal trips, let us urge more customers to place the responsibility with us to make your selections. Just make up your orders and specify Quality and heights desired. Try us and be pleased with our selections and our service too!

SERVICE TO OUR FRIENDS

Miss Wilma Gunter, General Office Manager

In serving our large list of customers throughout the Southwest, we strive to have associated with us the best skill, knowledge and personnel that we can obtain. In this manner, have we been able to serve the many Customers over a period of years in their most interesting Landscape problems. The constant assistance of our trained employees has meant much to the satisfaction of our customers.

Miss Wilma Gunter, who has been associated with our organization since 1926, acts in the capacity of General Office Manager and is known to our Customers and members of the Trade throughout the Country.

In connection with her work with our Firm, Miss Gunter was rendered in 1944, the TEXAS ASSOCIATION OF NURSERYMEN'S Annual Arp Nursery Award for Meritorious Service to the Nursery Industry of Texas. In the same year, she was awarded a U. S. War Bond for enlisting the greatest number of Members to the Texas Assn. of Nurserymen, with which association we are actively working.

THANK YOU, FOR YOUR PATRONAGE IN THE PAST—It is through the patronage of our Customers that we have been able to make the advancement thus far in our line of business, and which enables us to carry on the struggle to serve you in the best manner possible with your Landscaping problems from day to day.

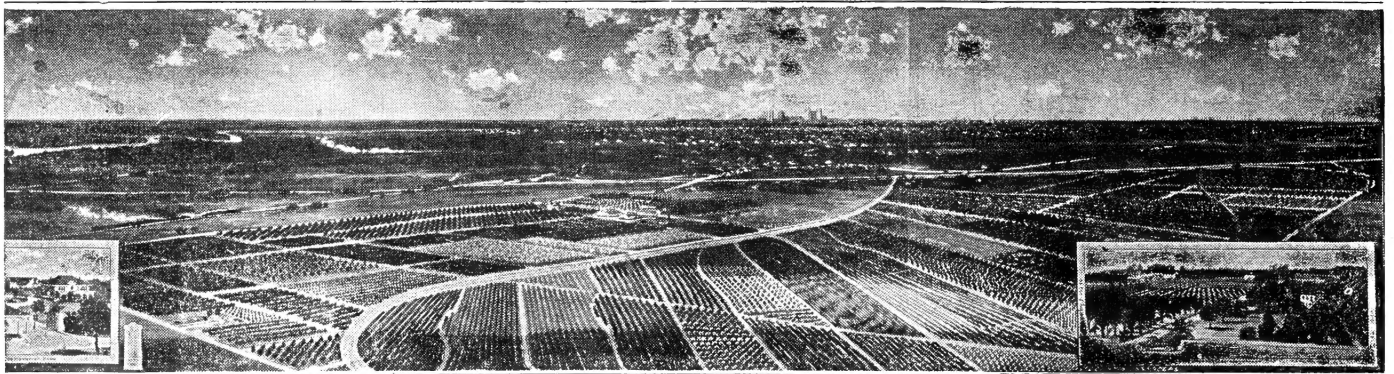

DEALERS & NURSERYMEN INVITED TO BRING LANDSCAPE PROBLEMS TO US

Through our knowledge of Plant materials and their use in the Landscape, we invite you to bring your Landscape problems to us. We will furnish you our best knowledge and skill in working them out to help you give your Customers the best results. We have done this for years, and find it is often a great help to the Nurseryman who may not be fully posted on what can be used or how to use it.

A NURSERY WITH A BACKGROUND OF OVER HALF A CENTURY IN THE SOUTH GROWING TREES

Some sixty years have passed since the present Griffing Organizations had their first inception in a small nursery in Northern Florida on land owned by the late D. C. Griffing, and managed by his five sons under the name of "Griffing Brothers."

Always the Griffings grew the stock they sold, offered the best of everything, experimented in every locality to find the most adaptable varieties, dug their Trees with care, packed under rigid inspection, and in all their activities gathered and disseminated information for the benefit of their patrons.

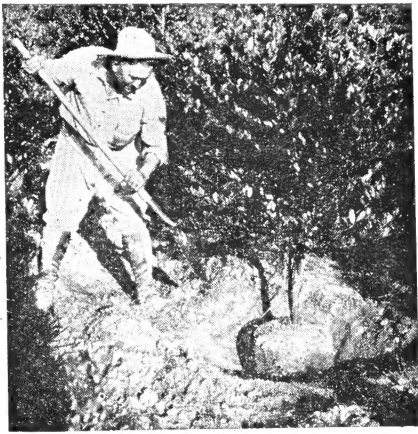

Panorama View of Our Extensive Nursery (200 acres of Griffings Quality Stock.)

ASSOCIATION MEMBERSHIP

To further the interest of the Nursery and Landscape Development and keep posted on affairs of interest to the Trade, we maintain membership in the following Trade Associations:

American Association of Nurserymen, Landscape Nurserymen's Association of the American Association of Nurserymen, Beaumont Florists & Nurserymen's Club, Beaumont Chamber of Commerce, Louisiana State Horticultural Association, Inc., Oklahoma Association of Nurserymen, Texas Association of Nurserymen, Texas State Florists' Association.

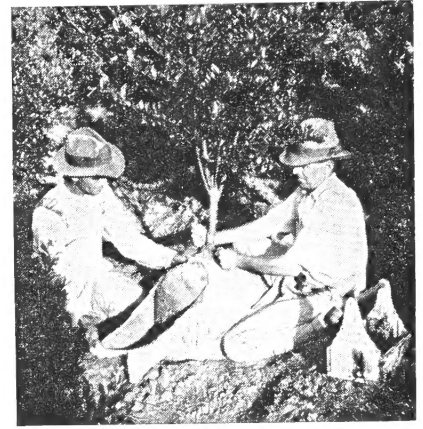

WE GIVE THE EARTH -- B & B

Digging a B&B Tree.

No Roots Exposed to the Air.

The Dirt Can't Break Away From the Roots.

A FEATURE ABOUT GRIFFING'S B&B NURSERY STOCK YOU MUST NOT OVERLOOK

Our GREAT SUCCESS in transplanting Trees and Shrubs safely at all Seasons may be largely ATTRIBUTED to our Wonderful Balling Soil. There is no OTHER JUST LIKE IT. We have the soil that is "just right" for Balling and Burlapping. The Ball is CUT out in one solid piece, often compared TO SLICING A "piece of cheese." Note the solidity of the Ball in the illustration.

CAUTION

Never lift Trees and shrubs by the Top. Lift the Ball Itself by grasping it with both hands around the ball, or Larger Balls by making a Sling of Burlap, so as not to loosen Roots in the Ball.

NB MEANS NOT BALLED

Or that the Trees or Shrubs SO LISTED are dug from the Nursery WITHOUT HAVING THE DIRT ABOUT THE ROOTS. When Trees or Shrubs are dug in this manner, they are puddled in THICK MUD; than mulched IN SHINGELTOW or SAWDUST, and tightly wrapped with paper and BURLAP to retain the moisture WHEN SHIPPED or delivered.

BEAUMONT BALLING SOIL

It is commonly known as "BEAUMONT LOAM," peculiar only to this IMMEDIATE SECTION. It is RICH AND BLACK, and when taken up in the form of a ball, IT WILL NOT crack or CRUMBLE, and does not DISSOLVE WHEN SET IN WATER for several days.

WIRING B&B TREES FOR SAFE HANDLING

For safety in handling large Specimens of Live Oaks, Camellias, Azaleas, Magnolias, etc., which require a sizeable ball of earth for transplanting, we recommend the wiring of the Balls after they are dug B&B, as a precaution in transplanting them. We offer this service at a nominal cost above the price of the B&B Trees, to those Customers who desire it.

LARGE TREES NEED PROPER HANDLING

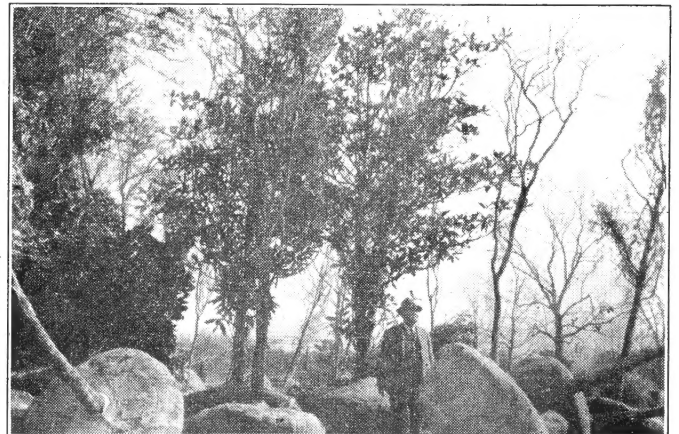

In handling large Evergreen Specimens, where they require and should have a large size Ball (B&B), averaging 24 inches width, or 18 inches deep we recommend wrapping the balls with Hog Wire, twisting it tightly around the Balls, after the Ball is properly burlapped. By doing this, they can be shipped and planted with perfect safety, as there would be no chance of the burlap loosening, or the Ball cracking in being shipped or handled.

Notice Hog Wire Fence Around Ball. Safe For Lifting With Chains and Power Winch.

Trees Dug with large size Balls from Griffing's heavy soil are uniform and solid, containing the root system of the Trees. After the Burlap is fastened on securely, Hog wire fence is used to wrap around the ball to make it more secure for handling. Chains are thrown around the Ball to lift it out of the hole, and onto Trucks or cars for delivery.

MAGNOLIAS AND LIVE OAKS READY TO LOAD

A group of Specimen Live Oak Trees and Magnolias dug B&B, and balls wired properly for loading into Railroad cars for shipment. Trees prepared like this handle easily and without injury and live and grow when they are planted.

PRICE FOR WIRING B&B TREES & SHRUBS

We have not included price of Wiring in listed prices of Specimens, but have left it optional with the customers if they want their trees wired, after they are dug and burlapped. Prices for the wiring of Balls, according to size ranges as follows:

Balls 24 inches in diameter	\$2.00 each
Balls 30 inches in diameter	2.50 each
Balls 36 inches in diameter	3.00 each
Balls 40 inches in diameter	4.00 each
Balls 48 inches in diameter	5.00 each
Balls 54 inches in diameter	6.00 each
Balls 60 inches in diameter	7.00 each
Balls larger in size than these will be priced according to the size of the Ball, quantity, etc., required!	

This also saves crating the Trees and Shrubs for shipment, and if planted locally, they can be loaded and unloaded and transplanted with more safety. It also saves the expense of bracing the Trees, and should they blow over where the trees are wired, they can be straightened up, even though planted a year or more, with perfect safety that the soil will not break loose from the roots.

GRADING TREES BY QUALITY

GRIFFING AND QUALITY

QUALITY NURSERY STOCK AND THE NAME "GRIFFING" have been associated together for over fifty years. To the Trade, as well as the public, **GRIFFING'S TREES** are known to mean the **Best Quality**, produced under the most adaptable conditions. It is with this same emblem of **Quality** that we aim to serve our old and new patrons.

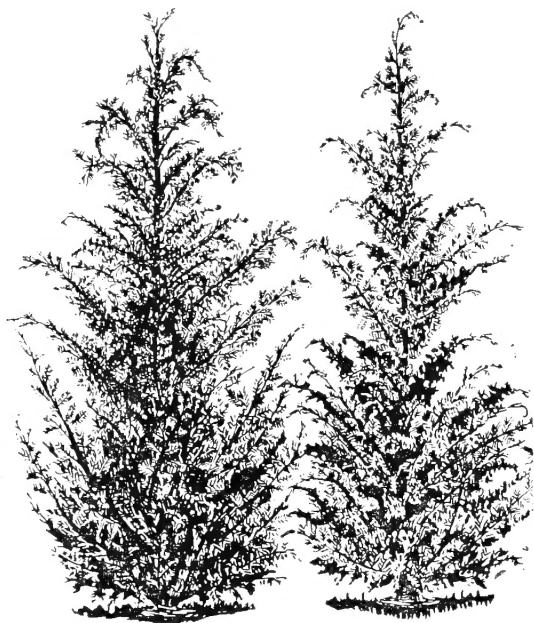

The **Highest Quality** does not mean the **Highest price**—instead it is always the **Cheapest**. Our Nursery stock is a product you are proud to own—it lives, it satisfies, and give results. It comes from a Firm with a record of long tested values of **Quality Production**.

WE GROW OUR OWN STOCK

We are not jobbers or brokers. We grow all of the Nursery Stock offered in this catalog at our nurseries, located near Beaumont, Texas, except Roses and a few Fruit Trees, which are grown under contract and our supervision.

The growing of Nursery Stock is a highly specialized business requiring an exact knowledge of plants and horticultural and scientific methods. After 50 years of successful growing, we can without boasting claim to be experts in our line.

Through costly experiments, we have been able to determine the most hardy and suitable varieties for the Southwestern territory, and on these varieties, we have concentrated our main efforts so that our large 300-acre Nursery may yield an abundance of these plants to meet the ever-increasing demand.

XXX XX
Sylvester Juniper. Which would you prefer?

PRICED ACCORDING TO QUALITY

The descriptions are followed by **OUR PRICE** for the different sizes, grades, and **QUALITIES**.

WHAT IS B&B?

Moving a Tree with **THE ROOTS** in the **DIRT** in which it **GREW**. The Griffing method of **B&B** has upset all traditional customs about **TIME OF PLANTING**, size that **CAN BE PLANTED**, and has eliminated years from planting **TIME** to the day when the effect is really visible.

ADVANTAGES OF B&B

When Trees and Shrubs are **TRANSPLANTED B&B** they grow; they **REQUIRE LESS** maintenance; they do not require **SEVERE PRUNING** to **MAR THEIR** Appearance; they are **EASIER** to **PLANT**, and a year or more **IS GAINED** in the **GROWTH** of a **B&B Tree** over one **PLANTED NB**.

Plants like people are individuals, and all **ROOT SYSTEMS** are not alike; therefore, balling cannot **BE MECHANICALLY** done for the sake of **LOOKS** and the best results secured. Our men are **TRAINED** to **DIG** our Trees and Shrubs with **Balls** to preserve the **ROOT SYSTEMS** of the Plants **FOR SAFE** transplanting.

HOW BALLING AND BURLAPPING (B&B) IS DONE—

Look at the photographs, showing the procedure of digging, lifting **FROM THE HOLE**, and casing with strong **BURLAP**. The feeding roots are in the **BALL**. The moisture and **SOIL** is held **INTACT**. No shock results from **DIGGING**. Plants start growth **MORE RAPIDLY**. The loss among balled plants **IS NEGLIGIBLE** and with proper care and attention **AFTER PLANTING** in the way of **WATER AND CULTIVATION**, there is no necessity of **LOSING A PLANT**.

HOW WE BALL

We do not **SPADE THE BALLS OUT** and tie burlap around the **LOOSENED SOIL**, nor do we **DRIVE** a **CYLINDER** around to cut roots **TOO SHORT**, but the **SOIL** is **SOLID**, never cracked and **SIZE OF BALL** to conform to the **ROOT SYSTEM**.

GRADING BY SPREAD

In 1923, the American Association of Nurserymen adopted a Standardized System for Grading Nursery Stock, using the symbol of **X's** to indicate **QUALITY** and dividing the various classes of Evergreens into Grade Groups. In our judgment, this is the only way to honestly grade and sell Nursery Stock.

When you visit our Nurseries, we will be glad to show you what is meant by Standardized Grading, and when you order, if you will specify the **Quality** you want, we will make your selection accordingly. We give the following illustration to show what is meant by Grading by **X's**—all plants are the same height, but there is a great difference in the general appearance and value.

XXX XX X
Griffing's Waxleaf Ligustrum, illustrating Quality of Plants.

XX AND XXX PRICES

Throughout this list, you will find the schedule of prices are according to **X's**.

XXX indicates strictly heavy, low branched, choice Trees or Shrubs.

XX indicates well developed, medium branched, good merchantable Trees or Shrubs.

X indicates poor quality, measured by height. All Nursery rows have some. Not listed in this Catalog.

SPECIMEN STOCK above **XX** and **XXX** selected or marked in the Nurseries will be priced according to its value.

YOU GET WHAT YOU BUY

THE GRIFFING SQUARE DEAL—Use Standardized Grading System so those who come to the Nursery and those who do not come, get exact Quality of merchandise as they specify. If you come to the Nursery, you will see the different Quality, but those who don't come, can rely on the Quality being given them as they designate in ordering. (We do not approve of the old fashioned way of letting the Professional Buyers select the choice of the stock early in the Season of current prices and force the ones buying later to pay the same price for the culls.) The System of Quality gives the purchasers a fair opportunity to buy, and a Standard to order by without personally selecting his material to get a "Square Deal."

The Thousands of Customers using Griffing Quality products make it profitable for us to carry on. Their patronage is appreciated, and their satisfaction is expressed in such testimonials as:

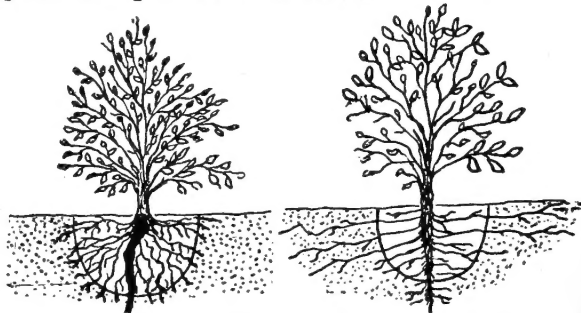

"100 per cent of our Plantings Lived and Grew."

"100 per cent of our Customers are satisfied when Griffing Trees and Shrubbery are used."

"100 per cent Profit is made on our orders where Griffing's Shrubbery is used."

IRRIGATION

This is one of the facilities **WE APPRECIATE MOST** in the production of quality Nursery Stock. Fresh **Neches River WATER** can be applied through **FLOOD IRRIGATION** anytime of **THE YEAR**. In this way the plants never suffer **OF GROWTH**, instead a compact **ROOT GROWTH** is developed. No roots have to **SEEK** moisture for a **LONG DISTANCE**. The illustration shows the **VALUE OF THIS** in digging **B&B Plants** for transplanting and saving of **ROOT SYSTEM**.

ALPHABETICAL LISTING

THIS CATALOG OF TREES AND SHRUBS HAS BEEN ARRANGED FOR YOUR CONVENIENCE

Trees and Shrubs CAN BE FOUND much easier when NAMES ARE ARRANGED alphabetically according TO THE FAMILY to which THEY BELONG. All listings are by the Common Names, followed by the Botanical Names. You should BE ABLE TO FIND whatever you want, and recognize it BY THE BRIEF DESCRIPTION. Should YOU DESIRE A Tree or Shrub NOT LISTED, write us OR CALL AT THE NURSERY; it is probable that WE CAN SUPPLY your needs, but we may not have enough of a certain variety TO CATALOG.

A Z A L E A S

We specialize in the Indica type of Azaleas, which are grown in the open Fields, and which will withstand transplanting at any season of the year with success. Our good sturdy field-cultivated Azaleas can be transplanted successfully where tender lathe-grown or pot-grown plants cannot be depended upon. We prize our collection of several thousand plants as being the best stock available in the Gulf Coast area. They have been regularly cultivated and pruned, sprayed so they are healthy and nice for use in the Landscape of anyone's grounds who demand the very best.

Specimens growing in our Fields ranging up to 8 ft. Spread, very thick and bushy plants, available this Season which can be dug B&B and transplanted successfully.

A Z A L E A

With their Evergreen foliage, and Gorgeous Blooms in the early Spring Season, no planting is considered complete without them.

DAPHNE SALMON

A. indica

Medium sized flowers, pleasing Salmon coloring. Mid-Season bloomer.

Class	Min. Height	XX	XXX
B&B	12 in. Ht.	\$ 1.20	\$ 1.60
B&B	15 in. Ht.	1.80	2.90
B&B	18 in. Ht.	2.90	3.80

PRESIDENT CLAY

A. indica

Blooms early, flowers deep Salmon-pink. Same as Dixie variety.

Class	Min. Height	XX	XXX
B&B	15 in. Ht.	\$ 1.50	\$ 2.10
B&B	18 in. Ht.	2.10	2.75
B&B	24 in. Ht.	2.80	3.90
B&B	30 in. Ht.	3.90	4.90

B&B	5 ft. Sprd.	10.50	15.00

SPECIMENS 5 ft. spread and larger at \$20.00 and up.

AZALEAS ARE COLORFUL

NO GREATER MASS OF COLOR THAN WHERE AZALEAS ARE USED

All our Azaleas are sturdy, field-grown, heavy branched, measured by spread, and transplant with excellent results. Try them!

There are no more beautiful Flowering shrubs than the INDICA-TYPE of Azaleas for the "Gulf-Coast".

HOW TO CULTIVATE AZALEAS

Mulching with decayed leaves, preferably those of hardwood trees, is a distinct advantage. Peat is also a splendid mulch for Azalea beds, as it retains the moisture. Applications of aluminum sulphate may be necessary when leaves become yellow, which indicates that the soil has become impregnated with lime.

All Azaleas require an Acid Soil, hence Leaf-Mold or Peat Moss for Mulching the roots should be added over the surface of the Plant Beds. Lime and Alkali conditions of soil require Special preparation with new Acid soil.

GRIFFING'S STANDARDIZED GRADED TREES AND SHRUBS GIVE SATISFACTION!

ABELIA

GLOSSY		A. grandiflora	
Small glossy evergreen leaves, with pinkish-white flowers in Spring and Summer. Hardy, thrifty growers.

Thuja orientalis bakerii

T. or. Griffing's New Hort. variety

T. or. Griffing's Hort. Var.

BAMBOO—Bambusa

(Evergreen Reed.) Large graceful clumps with feathery foliage and stems. Can be used as Specimens on the Lawn or Tall Growing Borders, or hedge-rows and Screens. Good for Clipped Hedges or Sheared Specimens. Does not spread from suckers like ordinary Reeds and Georgia striped Cane.

Bamboo along Fence Line for Screening is Most Desirable

USE BAMBOO EXTENSIVELY

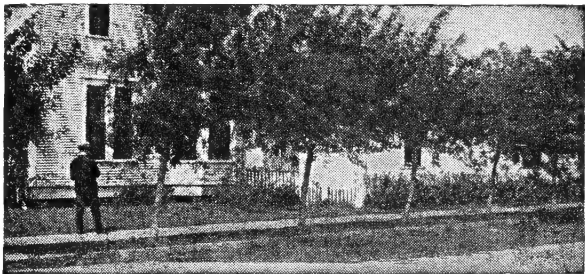

There are many uses which can be made of the Bamboo in general plantings in this area. The many varieties make an interesting selection in habit of growth and color. The Bamboo is used extensively in screen plantings, formal clipped hedges, in mixed-border plantings, and as specimens in the lawn. Also useful in wind-breaks for the pasture and in retaining walls to hold soil from erosion.

ASPIDISTRA

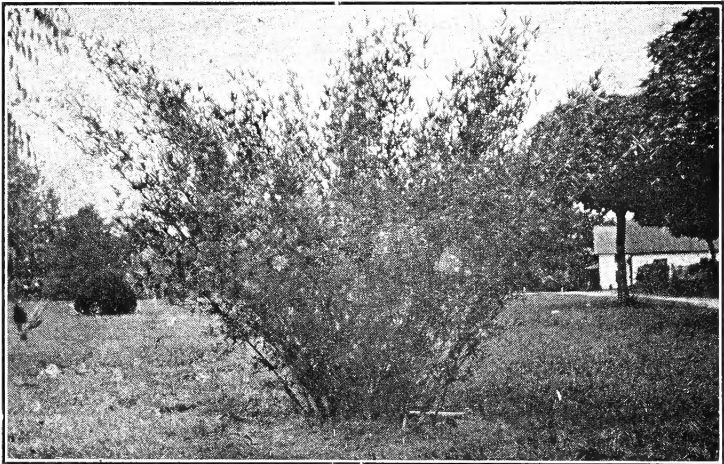

COMMON			A. elatior
Large rich green leaves, ornamental in containers, or in Shady places outside in Gulf Coast area.			
	Min. Height	XX	XXX
5 in. Pots	18 in.	\$ 1.10	\$ 1.60
6 in. Pots	20 in.	1.60	2.25

ASH

ARIZONA		Fraxinus velutina		
(Evergreen Ash) (Rio Grande Ash) Especially suited for the Gulf Coast, does not shed leaves in the Summer Season. Nice shade tree.				
Class	Min. Height	Caliper	XX	XXX
B&B	8 ft.	2 in. Clpr. . . .	\$ 3.75	\$ 4.90

B&B	10 ft.	3 in. Clpr. . . .	6.30	7.90

Arizona Ash Trees make excellent deciduous shade trees for the Home grounds, in parkways, and as wind-breaks.

Bamboo Makes Nice Specimen on the Lawn or Very Effective for Screenings.

ALPHONSE KARR	B. nana alphonse karri
Attractive soft-green foliage with stems of golden yellow, green stripes lengthwise.	
FEATHER	B. Vulgaris
Strong grower, Dark green, feathery foliage, green stems.	
GIANT	B. dendrocalamus
Large growing, green-stemmed, open growth, wide long leaves.	
GOLDEN	Phyllostachys aurea
Stems golden, large grower, graceful green foliage.	

NINGALA	<i>Chimonobambusa falcata</i>
Dwarf habit. Evergreen Reed. Many small canes, low growing graceful arching effect. Foliage light green with tips of leaves curled. Yellow stems. Effectively used as Clipped Hedges.	

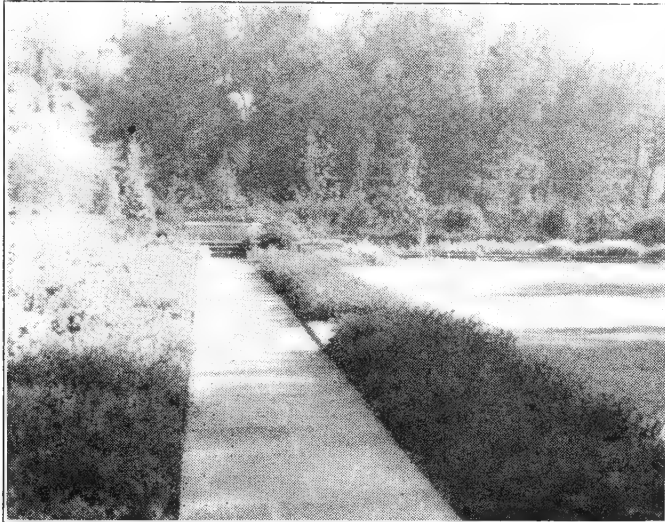

SILVERSTRIPE		Pleiblastus simoni variegatus	
Leaves have a Silver stripe lengthwise—Stems golden yellow.			
Class	Min. Height		XXX
B&B	15 in. Clump	5 ft.	\$ 2.00
B&B	18 in. Clump	7 ft.	2.70
B&B	2 ft. Clump	9 ft.	3.25
B&B	3 ft. Clump	12 ft.	4.90
Balled but not Burlapped, less 25% off B&B prices.			

CAPE JASMINE - *Gardenias*

We have excellent soil for the growing of Cape Jasmine (Gardenias) and when they are dug B&B from our heavy black Balling soil, they hold up and transplant for immediate results. We also pride our fields of Cape Jasmine shrubs very highly, as they are **free of NEMATODE** and **WHITE FLY** and you can use them in the most exacting planting with a pride of giving your Customers the very best.

CAPE JASMINE—Gardenia

One of the most commonly known Evergreen Flowering Shrubs in the Gardens of the South. Very popular for their fragrant, white flowers. Does not like Lime or Alkali soil. Prefers neutral or Acid soils.

Dwarf Gardenias are most useful to border walks, and fore-ground groups of a Formal Garden. They are green the year 'round, and produce a mass of tiny white sweet scented flowers in the Spring.

DWARF SPREADING—

Gardenia radicans prostrata nana

Spreading habit. Small, pointed leaves about one-half inch wide glossy green. Small *Gardenia* flowers, fragrant and snowy-white; blooms early in the Spring. Used for Low groups and borders.

SEMI-DWARF

Gardenia stricta nana

Semi-spreading habit. Leaves, dark green, about two inches long. May be grown in partial shade. Valuable for medium low groups or Foundation, plantings.

Class	Min. Spread	XX	XXX
B&B	18 in. Sprd.	\$ 1.20	\$ 1.60
B&B	24 in. Sprd.	1.60	2.10
B&B	30 in. Sprd.	2.10	2.90
B&B	36 in. Sprd.	2.90	3.70
B&B	4 ft. Sprd.	3.70	4.90

FLORIST USE OF GARDENIA FLOWERS

In the Spring months, when our thousands of field-grown plants develop flowers, we ship cut buds for use around Mother's Day and Memorial Day to Florists to use on these occasions. We invite you to place your orders with us for this purpose in Season.

Many Customers also order their B&B Shrubs in the Spring to sell after the flowers open. For this purpose we recommend ordering in March or April for full benefit of the blooms in May.

Hardy Everblooming Cape Jasmine

FORTUNE

Gardenia fortunei

(Fall Blooming type) Compact, bushy habit. Dark green foliage. More Hardy than Florida. Blooms are medium size, waxy white, and sweet scented, appearing in the Spring, and at intervals in the Summer.

FLORIDA

Gardenia grandiflora

Very bushy habit. Dark green, glossy foliage. Large white waxy scented blooms, produced only in the early Spring Season.

Class	Min. Height	XX	XXX
B&B	2 ½ ft.	\$ 1.50	\$ 1.90
B&B	3 ft.	1.90	2.40
B&B	4 ft.	2.90	3.80
B&B	5 ft.	3.80	5.40
B&B	6 ft.	5.40	7.60

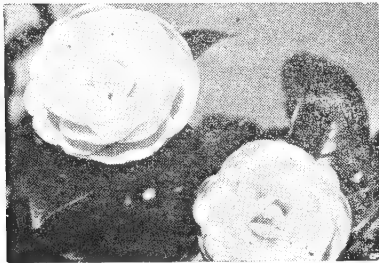

Blossoms of the *Gardenia* are most fragrant, and have many admirers during the Spring!

CAMELLIA—Japonica

Camellias are sometimes called the "Aristocrats of Southern Gardens". Glossy foliage and colorful Flowers make them unusually attractive.

NOTE: Names applied to varieties of the Camellia Japonica are as accepted in this Trade Territory, but since they have not been adopted as Standardized, we limit our responsibility to local accepted names and identifications.

Purity Camellia

Prof. Sargent

CHANDLERI ELEGANS

C. japonica

Flowers are double, very large, and of a Cherry-red to Rose pink spotted with white. Center petals interspersed with yellow stamens.

Class	Min. Height	XX	XXX
B&B	2 ft.	\$ 7.50	\$ 9.50

CRAPE - MYRTLE

Griffing's Watermelon Red Crape Myrtle

Interplanted with evergreens, beautiful effects are obtained. Massed in groups of any size, a display of color unrivaled is had the first summer. The most generous usage and the demand of recent years indicates ITS GREAT POPULARITY

CRAPE MYRTLE *Lagerstroemia indica*

The favorite Flowering Shrub of the South. A hardy and Heavy bloomer; it paints the Landscape in the Summer months with its brilliant blossoms in tones of Crimson Red, Pink, Lavender and White. Frequently termed the "Lilac of the South". Beautiful display of color unrivaled the first Summer. The most generous usage and the demand of recent years indicates its great popularity.

DWARF BLUE *L. i. courulea nana*

Low spreading, lavender-blue flowers in loose panicles which almost cover the plant.

DWARF PINK (Sneed) *L. i. rosea*

New dwarf growing type, which has a pastel Shade of PINK BLOOM.

LILAC *L. i. lilac*

Rounded top, spreading habit of growth, with pastel lilac flowers.

IMPERIAL PINK *L. i. rosea*

The light Pastel shade of this variety is excellent in many locations in the Landscape.

LAVENDER *L. i. lavendula*

The flower heads are large size of clear, bright Orchid-lavender—not the common dingy purple.

LIGHT PINK *L. i. rosea*

This is an upright growing type which has large flower heads of a very light pastel shade of pink.

MAGENTA *L. i. magenta*

A very deep red of outstanding merit. Very rich color.

WATERMELON RED (Griffing's Type) *L. i. rubra*

The Watermelon Red or Cerise color so much admired. Watermelon Red Crape Myrtle has flower heads exceptionally Large and fluffy, the color rich, clear and bright. No shrub makes such a gorgeous display in a planting as this. Our type is recognized as being the Best type on the market.

WATERMELON RED CRAPE MYRTLE Standards are offered in the following Specimens, which are well branched and larger than any selections we have in other varieties.

Class	Min. Height	Caliper	XXX
B&B 16 ft. 3 in. Clpr.			\$ 22.00
B&B 18 ft. 4 in. Clpr.			33.00

PRUNE EVERY WINTER: For best results Crape Myrtles should be cut back to One Foot of the ground when planted. By using B&B in big sizes you get better root systems. Then every year thereafter, prune them back to within two to four inches where they were the year before. In this way you get much larger flowers, thick branches, and dense foliage.

We grow most of ours in Balling Soil—it pays to Ball them. Write on order if Single Stem, or if Bushy Plants are wanted.

White Crape Myrtle

BALLED & BURLAPPED CRAPE MYRTLES transplant with unusual success from our Balling soil, to live, grow, and blossom heavy the First Season. B&B Crape Myrtle transplant into cold climates with success, whereas small NB plants Winter kill. Use B&B plants for immediate results in plantings.

WEeping PINK *L. i. prostrata*

Delicate Pink. Excellent for banking or under Windows or around ends of Parkways. Measured by spread up to 5 ft.

NOTE: Those listed up to 5 ft. spread close to the ground, where those on stems branched high make an umbrella top.

Class	Min. Spread	XX	XXX

From 4 in. Pots	1.00

E L A E A G N U S

No group of Broadleaf Evergreens have grown more in favor during the past few years than the Evergreen Elaeagnus. A most versatile Shrub, for foundation plantings, groups, borders or hedges. To our knowledge no other Shrub grows better than Elaeagnus in Shady Locations, as well as in Full Sun. Small white flowers, followed by small transparent Red Edible Fruits.

NOTE—All Elaeagnus Cutting Grown.

BROADLEAF E. pungens macrophylla
Leaves are large and pointed, upright grower, fast growing type.

FRUITLAND E. pungens fruitlandi
Very similar to Broadleaf, only it has more open, weeping growth.

SIMON E. pungens simoni
Small dark green leaves and Vase shape growth. Preferred by some for background planting or a tall narrow hedge.

GRIFFING'S COMPACT E. Griffing's Hort. Var.

New and unusual type, a sport of the Fruitland discovered by us in 1934. Preferred to all other varieties of Elaeagnus by many Customers and Landscape men because of its close Compact, attractive growth. Semi-spreading compact habit, leaves of medium size and quantities of small branches make it very attractive and good for clipped Hedges or Specimens.

Class	Min. Height	XX	XXX
B&B	2 ft.	\$ 1.40	\$ 1.90
B&B	2½ ft.	1.90	2.50
B&B	3 ft.	2.50	3.50

DWARF ELAEAGNUS FOR HEDGES

The following type of Elaeagnus we offer in low growing very compact growing shrubs, most useful for natural border groups, or can be trimmed into neat formal hedges.

DWARF THORNY ELEAEGNUS E. pungens nana

Semi-spreading compact habit. This variety is exceptionally good when planted under windows where it can be constantly sheared, making a wide spreading Evergreen growth. This variety has small dark green foliage with silvery cast beneath, compact bushy growth.

Class	Min. Spread	XX	XXX
B&B	18 in.	\$1.40	\$ 1.90
B&B	2 ft.	1.90	2.50
B&B	2½ ft.	2.50	3.50
B&B	3 ft.	3.50	4.50
B&B	4 ft.	4.50	5.50

FIRETHORNS

For colorful shrubs to use in the Landscape, there are no more beautiful selections to use than the Firethorns (Pyracantha) with their wealth of colorful Red, Orange and yellow Berries during the Fall and Winter Season. These are useful as Specimens, in Background plantings in the Garden, and trained into specimens in Foundation groups beside walls.

Griffing's Grown Firethorns are easy to transplant—as they are grown on our heavy black balling soil, and can be taken up with a solid Ball without injury to the root system. We recommend reducing the crop of berries in transplanting the shrubs unless they are given careful attention in transplanting, as the berries take lots of strength at the time of planting.

FIRETHORN—Pyracantha

Sometimes called "Crataegus" and "Evergreen Hawthorn". A family of plants of the greatest beauty in masses against foundations, along borders, etc.; graceful branches, Brilliant Winter berries.

The Berries on the FIRETHORN cling till Spring when attractive White Flowers take their place. Blooming at the same time as the Spirea, (Bridalwreath) and most attractive, so that the plant has always some beauty in addition to its Green foliage. The large sizes require large balls and severe pruning for successful transplanting from our Black Balling soil.

Red Berries of Firethorn Attract Attention

ALL FIRETHORNS CUTTING GROWN:

Colorful Berries on all Pyracanthas shown up in Fall and Winter Season. They vary from the orange color of the Lalandi, to red-dish-orange, and scarlet of the New "Wilma" variety.

DUVAL *P. duvaldi*
Semi-upright habit of growth, large red berries in mid-Winter.

GLORIOSA *P. gloriosa*
Orange-Red Berries in large clusters. Ripens in Fall and Winter.

LALAND *P. lalandi*
Upright grower. Orange colored berries in early Fall.

YUNNAN *P. yunnanensis*
Small red berries. Low natural spreading habit of growth.

Class	Min. Height	Caliper	XX	XXX

SPECIMEN FIRETHORN AVAILABLE

In our Fields we have many nice Specimen Firethorns, larger than listed, which will be gladly sold upon personal selections. We invite you to select them for your special requirements.

THE NEW FIRETHORN "WILMA"

Altho we have offered this variety of Firethorn, or Pyracantha for several years, it continues to grow in popularity, and each year the demand for the plant increases.

This new variety was introduced by us as a beautiful shrub. Its masses of large red berries in the Fall and Winter months add a wealth of color to any planting. In the Spring the blossoms are striking—much like the Bridlewreath in flower. It has many uses in the landscape planting, always pretty and very colorful.

Cluster of Berries from Wilma Firethorn.

The New Pyracantha "Wilma"

UPRIGHT GLORIOSA

Same as Gloriosa except it has an upright habit of growth.

P. gloriosa

WILMA

P. Griffing's Hort. var.

A new Firethorn we introduced that has upset all records for sales. It is upright in habit of growth, masses of White flowers in the Spring and clusters of large Gorgeous Red Berries during the Winter Season.

WILMA FIRETHORN is the most talked of and in greater demand than any other variety we grow.

SPECIMENS of ALL VARIETIES \$14.00 up.

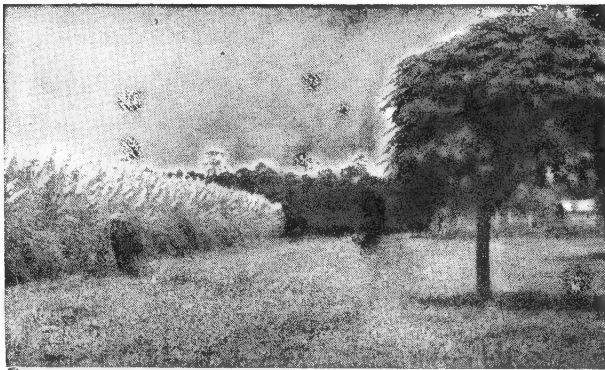

TREATMENT FOR MORE BERRIES ON FIRETHORN

To keep a regular crop of Berries on the Firethorns annually, the Shrubs should be fed with Potash Fertilizer each Winter. This is especially true when the soil is high in Nitrogen content.

PRUNE FIRETHORNS in the SPRING

To keep Firethorn shrubs in shape prune in the early Spring before the blooms open, to avoid cutting off the berries for the Fall. New growth can be trimmed in the Summer or late Fall without injury to the berries.

GRASSES—ORNAMENTAL

Pampas Grass

PAMPAS GRASS *Cortaderia argentea*
Beautiful light green foliage, gracefully recurved. In the summer this Grass sends up tall, silvery plums 2½ ft. long, and 1 ft. wide, which are very distinctive and beautiful in both form and color.

PINK PAMPAS GRASS *Cortaderia argentea*
Beautiful light green foliage, gracefully recurved. Sends up tall pumes in the summer, which have a pinkish hue, and very attractive.

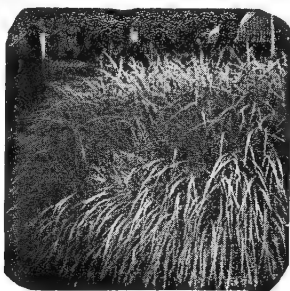

STRIPED EULALIA *Miscanthus sinensis variegatus*
Attractive light green foliage, with decided white pin stripes lengthwise of the blades. Slender white plumes.

ZEBRA GRASS *Miscanthus sinensis zebrinus*
The foliage is light green with white stripes crosswise of the blades. Small, slender white plumes.

Eulalia Grass

Pampas Grass

GRASS—Lawn

ST. AUGUSTINE GRASS *Axonopus compressus*

This new Grass fills a long-felt need for a ground cover under shade tree and a permanent green lawn. This type dos not grow from seed. Must be planted from sod. With proper care, a fine lawn can be had in a short time.

Sod Cut in 1 foot squares

1 to 10 yards	\$ 1.75 per sq. yd.
10 to 100 yards	1.40 per sq. yd.
100 or more yards	1.20 per sq. yd.
1 yard cut 3x3" planted 12" apart plants 12x12 feet	
1 yard cut 2x2" planted 18" apart plants 36x36 feet	

HOW TO PLANT ST. AUGUSTINE GRASS LAWNS

The St. Augustine Carpet Grass has come to be the most favored for the lawn of the home grounds throughout the Southwest. It does make a marvelous lawn grass, and once a good lawn, it continues to be attractive.

The most successful method of planting it is to prepare the soil to the desired level, then cut the sod into small clumps 2½ or 3" squares and plant on 12 to 15 inch centers over the entire area. Apply 1½ teaspoonsful of commercial fertilizer in hole before planting under the clump of grass. Thoroughly pack grass into hole and keep well watered. Mow lightly tall stems until it sends out runners to cover the lawn surface, then keep cut regularly to any desired level.

G U A V A—Feijoa

LEMON *Psidium cattleianum*
The fruit is bright yellow. Very fine for eating. Foliage light glossy green.

Class	Min. Height	XXX
B&B	3 ft.	\$ 1.90

STAR JASMINE VINE (Confederate Jasmine)

J. trachelospermum

Evergreen vine grows into strong vine producing masses of small star-shaped blooms in Spring.

From	Min. Size	XX	XXX
From	4 in. Pots	\$ 1.50	
From	5 in. Pots	2.00	

DID YOU FIND THE ITEMS YOU WANTED?

This Catalog has listing of the Trees and Shrubbery which we grow and offer in quantity, listed in Alphabetical order, intended to make it easy to find. If however you fail to find some item, write us about it and it may be that we have it but not in sufficient quantity to list.

HOLLY - - ILEX

For the Old, and for the New Plantings throughout the South, there is always a demand for the use of the beautiful Holly Trees. We grow the best selections for use throughout the Southwest, and prize them very highly for general use in the Landscape. They are useful as individual Specimens in the Lawn, in groups for their colorful Berries, and excellent for lasting Evergreen Hedges in the finest of Garden plantings.

HOLLY-Ilex

There are many kinds of Holly, some make Trees, other Shrubs; all are valued for their Berries. When loaded with beautiful Berries, they are the glory of the Garden. The Hollies are adapted to many uses—as individual Specimens, in groups, foundation and border planting, and formal Clipped Hedges.

AMERICAN				Ilex opaca	
BERRY BEARING-PISTILLATE-FEMALE. Tall, pyramidal growth with horizontal branches. Large, rounded, glossy dark green leaves with spines. Bears masses of bright Red Berries in Winter Season.

B&B	14 ft. 4 in. Clpr.	13.50	18.00

BUFORD HOLLY (Chinese) Berried Ilex Cornuta

Upright growth, large dark green leaves, with two thorns prominent at end of leaf. Large red berries, all Plants Cutting grown.

Class	Min. Height	XX	XXX
B&B	2 ft.	\$ 2.25	\$ 2.90
B&B	2 ½ ft.	2.90	3.90
B&B	3 ft.	3.90	4.90
B&B	4 ft.	4.90	5.90
B&B	5 ft.	5.90	7.20
B&B	6 ft.		9.20

SPECIMENS—we have 4 ft. to 7 ft. heavy Specimens which will run one grade higher in price than regularly listed xxx quality.

DAHOON HOLLY Ilex cassine

BERRY BEARING-PISTILLATE—FEMALE. Pyramidal growth, oblong leaves, dark green with no spines. Bright Red Berries in early Fall.

Class	Min. Height	XX	XXX
B&B	8 ft.	\$ 4.80	\$ 6.50
B&B	10 ft.	6.50	9.90

DAHOON HOLLY Ilex cassine

NON-BERRY BEARING, or STAMINATE—MALE PLANTS.

Class	Min. Height	XX	XXX
B&B	8 ft.	\$3.20	\$ 3.90
B&B	10 ft.	3.90	4.80

DAHOON, THORNY HOLLY I. cassine

BERRY BEARING-PISTILLATE—FEMALE. Similar to Dahoon but has Thorns on leaves. All plants Cutting grown.

Class	Min. Height	XX	XXX
B&B	6 ft.	\$3.90	\$ 5.20
B&B	7 ft.	5.20	6.80
B&B	8 ft.	6.80	9.60

DECIDUOUS HOLLY I. decidua

BERRY BEARING-PISTILLATE—FEMALE. (Possum Haw). Holds Berries after leaves shed off in Winter season.

Class	Min. Height	XX	XXX
B&B	5 ft.	\$ 1.90	\$ 2.50
B&B	6 ft.	2.50	3.50
B&B	8 ft.	3.50	4.90

DECIDUOUS HOLLY

NON-BERRY BEARING STAMINATE—MALE PLANTS.

Class	Min. Height	XX	XXX
B&B	5 ft.	\$ 1.40	\$ 1.70
B&B	6 ft.	1.90	2.40
B&B	8 ft.	2.40	3.40

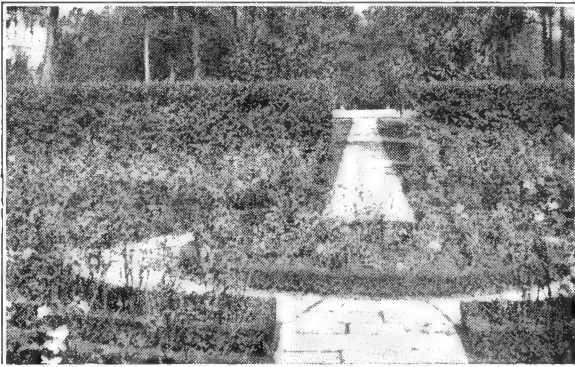

CAUTION: There should be 1 (male) Staminate plant for every 5 female or Pistillate for cross-pollenization of the plantings.

YAUPON HOLLY

Ilex vomitoria

This is undoubtedly the best of the southern native shrubs. It can be kept sheared resembling the fine-leaved Boxwood. The finest shrubs for compact hedges, sheared or unsheared. The young stems are light brown, turning to a light gray. The leaves are small, lustrous green above, and paler beneath, and cling from shady locations, or in the open sun. Makes the best Evergreen Hedge. Also, useful as specimens, screens, accents in foundation plantings; in fact, anywhere in the Landscape planting. They can be pruned to any shape or size, and with little work, look well at all seasons. Immune from all known kinds of insects and fungus diseases.

Nursery grown, root pruned, balled from our Beaumont Balling Soil. Compact growth, highly improved over those grown in the woods. We have sheared some into Globes, Cones, Squares and Pyramids. We also grow blocks for Hedge Purposes and constantly headed back while small makes low compact hedges to start with. Umbrella shaped trees or compact bushy shrubs.

Sheared Yaupon Holly Hedge—After 5 years only 10 in. high and 6 in. wide. American Holly Hedge in background.

YAUPON HEDGE or CLIPPED BORDERS

Not Bearing Yet, or Staminate

BEST HEDGE KNOWN, free from insects, compact growing and REQUIRES LESS SHEARING than other hedge plants, VERY HARDY, having dark green appearance. The best all around hedge CAN BE KEPT SHEARED not over 8 to 12 inches high or wide, or it can grow up and make large formal hedge, loose, natural growth border or screen hedges. These have BEEN SPECIALLY TRAINED FOR HEDGE PURPOSES, having been continuously HEADED BACK to make them compact and BUSHY FROM THE GROUND.

YAUPON HOLLY—Natural Growth

BERRY-BEARING-PISTILLATE — FEMALE PLANTS. When covered with bright Red Berries in Winter there is nothing prettier.

Class	Min. Height	XX	XXX
B&B	2 ft.	\$ 1.40	\$ 1.60
B&B	2 ½ ft.	1.60	2.10
B&B	3 ft.	2.10	2.90

B&B	5 ft.	3.20
B&B	6 ft.	4.40
B&B	7 ft.	5.25
B&B	8 ft.	8.40

YAUPON HOLLY—Standard with Sheared Ball on Top—Berried or Pistillate Plants.

These plants have been sheared and shaped for use in Landscape Plantings where a selection of this type is required. The single stems average from 18 inches to 36 inches high on top of which the branches have been sheared to a ball shape compact growth. In ordering, specify the approximate height of stem desired and we will be glad to match uniform pairs in our selection to correspond with your special requirements as near as possible. In our listing we give the spread of the ball trimmed on top of the stem which represents the width, and the average height of the ball is approximately two-thirds of the width.

Class	Width of Ball	Height of Stem	XXX

GRIFFING'S NEW HOLLY INTRODUCTION!

We always strive to add or improve upon the selections of Trees and Shrubs for better use in the Landscape plantings of the Southwest. When we find something that is outstanding and which has stood the test in our Experimental grounds after years of trying it, we then recommend it to our Customers for use.

A NEW HYBRID HOLLY

The Slack's Holly is another new introduction to the gardening public of the Southwest by ourselves, of which we are very proud. This is a hybrid of Chinese selection, which develops into a lovely upright specimen, bearing lots of large red berries each season. Berries remain on for several Seasons, and it does make one of the most outstanding Specimens in the Landscape.

SLACK'S HOLLY I. cornuta Slack's New Hort. var.

Chinese Holly, grown from cuttings. Unusual type, upright natural habit of growth, holding Berries long periods, such that always covered with Red Berries after attaining Specimen size.

Dark rich green, vase-shape habit of growth.

Class	Min. Height	XX	XXX
B&B	3 ft.	\$ 2.90	\$ 3.50
B&B	4 ft.	3.60	4.50
B&B	5 ft.	4.50	5.50

JUNIPER

The family of Junipers include a large collection of Evergreen plants, ranging in size and character of growth, such that you can find a good variety to fit almost any desired place in the Landscape. We highly recommend Junipers for the Gulf Coast rather than any other type of Conifer, as they thrive in this area and live for an indefinite period of time. We therefore use the Junipers for a permanent planting in the Landscape.

GRIFFING'S Type Pfizer Junipers

PFIZER JUNIPER

J. chi. pfizeriana

The most handsome and popular of the Spreading Junipers. Naturally low, flat spreading form, broad and picturesque, showing unusual grace and charm, with fern-like branches, lying close to the ground. Its foliage is beautiful and feathery, bright green with blue-gray tinge. Excellent in all kinds of soils and weather conditions. Its flowing lines are especially valuable in all plantings. The most used of all Spreading Junipers. Withstands the soot and dust of Cities.

Class	Min. Spread	XX	XXX
B&B	2 ft.	\$ 1.90	\$ 2.70
B&B	2 1/2 ft.	2.90	3.80

SYLVESTER

SYLVESTER

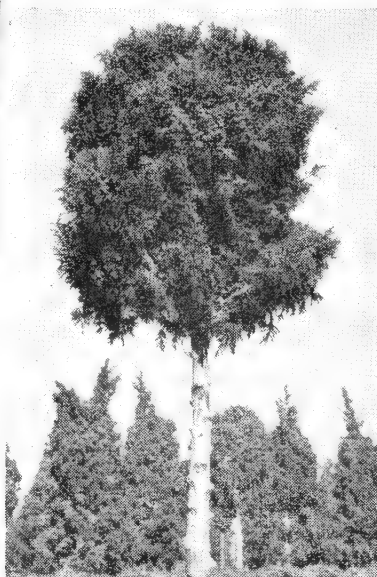

Juniperus chinensis femina

Loose pyramid, with irregular sprangled, upright habit, branches weeping at the tips, in its natural form. The needle-like foliage has a steel-gray color; rather unusual feathery effect, grayish in center of plants, light green, with older foliage a rich dark green. Thrives in all kinds of soil, wet or dry; withstands heat, drought, and all weather conditions.

This makes a fine specimen on the open lawn, for the accent points in foundation plantings, in masses and groups. Withstands shearing beautifully, and can be shaped into any form. Its real beauty is in its natural, irregular, sideling effect.

For black waxy or light sandy soil, the Sylvester is the best all around Juniper, as it can be used in so many places. It always maintains a dark green appearance, is easy to grow, and always presents a pleasing effect. Should be planted wherever a Coniferous Evergreen is desired.

The Sylvester is highly desirable for use as informal hedges, for screening purposes, as it stands shearing readily. It may be used for clipped hedges, or sheared specimens are useful in formal gardens.

Sylvester Juniper Trimmed to Standard with Ball on top.

Sylvester Juniper The Best Juniper for the Southwest

SYLVESTER JUNIPER

J. chi. femina

This Juniper can not be surpassed as it adapts itself to all kinds of soils, and can be sheared to most any shape. Its natural sideling growth with many leaders is very striking. Easy to transplant.

O R A N G E S—Citrus

For the black, waxy soils and stiff clay or flatwood lands of Texas and Louisiana. Citrus Trees should be low branched and dirt banked among limbs during Winter months. Our low branched Trees are sold according to caliper, measured just below the branches, not by height or age.

All Citrus budded on Citrus Trifoliata Root Stock.

ADVISE BANKING

We advocate the use of low branched trees, which are better able to withstand cold than those trained up on one slender stem, and in addition we have found that banking dirt in a mound high up around the tree 18 or 20 inches will protect the body of the tree from freezing, and at the worst, when such precaution is taken, only the smaller branches can be lost, and the next crop materially reduced.

SATSUMA ORANGE (Improved)**Citrus oonshiu**

This "Kid Glove" type is the early market Orange for the Coast Sections. Hardest Orange known. Begins bearing the second year. Fruit is medium size, flattened, deep orange color, fine grained, juicy, sweet and delicious. Seedless and thornless.

Fruiting Satsuma Orange Tree. (with 2000 Oranges)

PLANT TREES THAT GIVE RESULTS: In the Gulf Coast area where Citrus trees are successfully grown, it is important to plant trees that are budded on Citrus Trifoliata understock. Trees budded on other roots are not successful throughout this area. We grow our trees specifically for the Coastal area, and highly recommend them for good results.

OAKS ARE
EVER-
LASTING

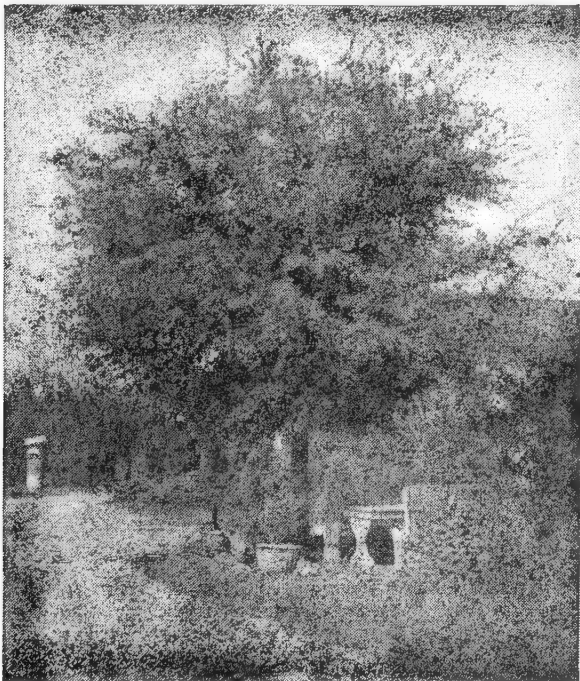

The Shade Tree
of the South,
nothing can com-
pare to the
MAJESTY of the
OAKS—because
of their LONG-
EVITY, ever-
lasting beauty
and RAPID
GROWTH, the
Oaks are now
preferred to all
other Shade
trees.

PLANT EVERGREEN LIVE OAKS
O A K S—Quercus

Live Oaks are rapidly becoming the most popular
Shade Tree in the South, because they are Evergreen,
and make such a Shapely tree for any purpose they
may be used. The Spanish type of Live Oaks are the
Fastest growing variety.

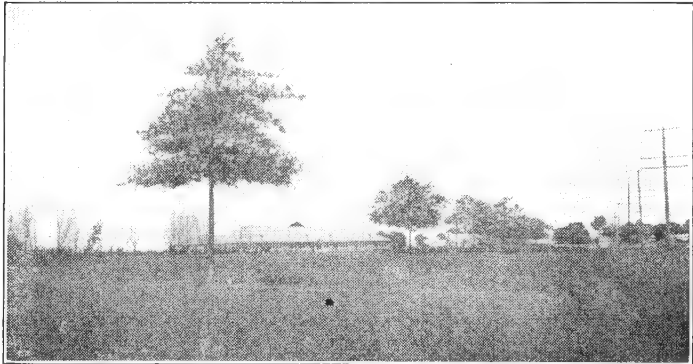

We have the complete stock from Acorns gathered
in Florida from the choicest isolated groves in exist-
ance, so there is not a chance of hybridizing. This
true type of FAST-GROWING OAKS is designed to
revise the idea that Live Oaks are a slow growing
tree, much different from the ordinary native Live
Oak tree.

Fast Growing Evergreen Spanish Type Live Oak

Nursery grown Live Oak Trees Live and thrive
under all conditions when the Trees have been trans-
planted and root-pruned and properly Balled and Bur-
lapped from the right kind of soil and pruned properly
as they are dug for shipment.

Our Oaks are given careful attention, all forks
being cut off, with the center stem retained, forc-
ing all branches to come out horizontally from the
main trunk. With this training, the center stem
continues to grow upward, and the horizontal branch-
es form a beautiful tree.

Spanish Live Oak trees planted along the front of our Nursery
showing how they naturally shape after a short period of growth.

LIVE OAK Quercus Virginiana

There is nothing more beautiful than the true
“SPANISH” LIVE OAK. This type has thick dark
green, oblong, pointed leaves that glisten in the sun-
light, the under-side being a grayish-green color. Al-
ways clean, rich foliage. Very straight bodies. From
young seedlings we trim to single stem in center, not
allowing forks. In years to come, forked trees may
split open and ruin the tree.

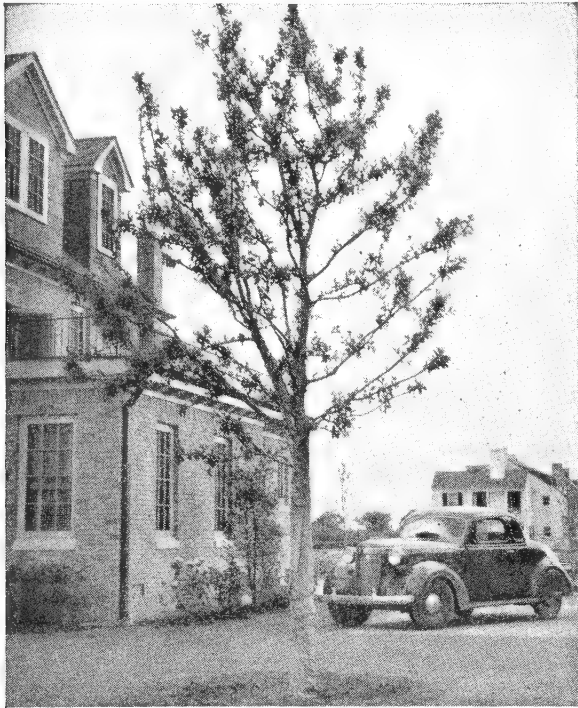

PRICES FOR THE SPANISH LIVE OAK:

Class	Min.	Height		XX	XXX
B&B	7 ft.	1 1/4 in	Clpr.		\$ 3.80
B&B	8 ft.	1 1/2 in.	Clpr.		4.75

PLANT BIG OAK TREES

SHADE TREES are the most important item to get planted in the general Landscape, and immediate effects can now be obtained by use of Specimen Trees. The Evergreen Live Oak (Spanish Type) has come to be the most favored type for general planting in the Southwest.

Many Customers have lost years in developing their planting, and want to make haste for early results. To satisfy such demands, we are able to offer nicely developed Field Grown Specimens, ranging from 4 inch Caliper to 10 inch Caliper, with nicely shaped tops for immediate transplanting. Where the trees are root-pruned and cultivated in our fields, we have no hesitancy in moving them successfully in these sizes for immediate and satisfying results.

Five inch Caliper Live Oak two months after transplanting

For the best results in planting our Live Oak Trees, we urge you to let us use our Best Judgment in Pruning the tops when we dig your orders for shipment. We recommend stripping and thinning out all the small limbs, the size of a pencil or smaller.

WIRING THE BALLS

We recommend placing Hog Wire Fence around balls from 2½ inch caliper up. Where we ball and deliver quantities of Live Oak and specimen Trees and Shrubbery without wiring, we consider the price a good investment for the Customer. See price of wiring elsewhere in the catalog.

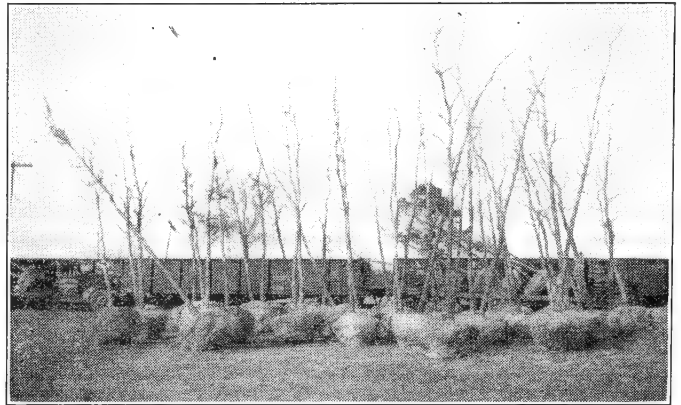

Specimen Live Oaks Enroute to Planting.

Experimental reports have been made by Experiment Stations after several years of study on suitability of soil for growing Live Oak trees. The tests show that they will grow on any kind of soil equally as well as on another, whereas, deciduous Oaks can only be grown on sour soil. Tests have also been made that Spanish Live Oaks ARE NOT susceptible to Texas Cotton Root Rot.

B&B SPANISH LIVE OAKS READY FOR LOADING

Our orders for Live Oak trees are dug promptly from our large fields of trees. After they are B&B (Balled and Burlapped) and wired if necessary, we haul them to the Railroad siding to be loaded onto Railroad cars for shipment. Trees are pruned and ready for shipment before they leave the field.

SHIPMENT VIA GONDOLA FREIGHT CARS

We find after several years practice in loading, that large Live Oaks are better handled for shipment in open Gondola cars, and where possible ship two 50 ft. cars locked together, so the tops can be overlapped to the center. This makes a double minimum car shipment, and they carry in good shape and can be unloaded easily.

NATIVE WESTERN TYPE LIVE OAK *Q. virginiana*

Nursery grown and root pruned, but slow growing native type, more irregular in shape of growth.

PALMS FOR TROPICAL BEAUTY

Nothing makes our Southern towns more INVITINGLY TROPICAL, especially in the eyes of our NORTHERN VISITORS, than the Palms, at home in OUR MILD CLIMATE. Lofty palms lining an avenue suggest stability and dignity. A careless grouping of palms with other evergreens makes for an EFFECT OF LUXURIANCE that NOTHING ELSE can create.

By selecting Hardy varieties, they can be planted a 100 miles inland from the Gulf. They should be planted extensively, as Northern Visitors look for the distinctive tropical effect of Palms in our South-land landscape.

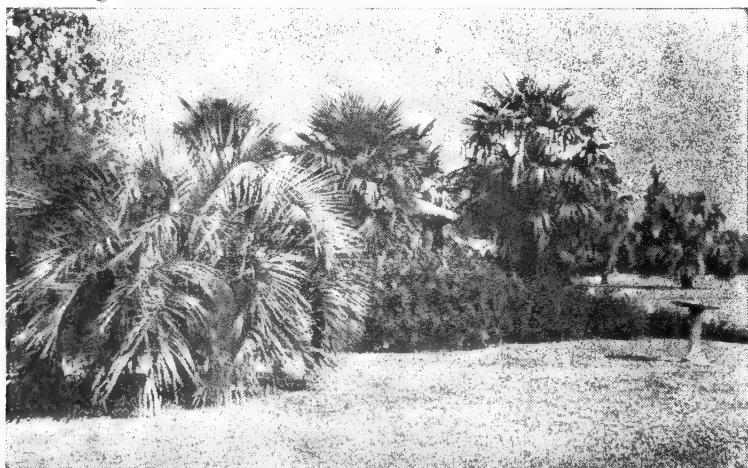

Beautiful Hardy Pindo Palm

PINDO PALMS

Cocos australis

Cocoanut Palm growth. Leaves similar to Date Palm. Its long drooping leaves blue-green color are very attractive. Very hardy, will stand the ordinary cold weather inland 100 miles from the Gulf. Bears edible fruit in early Summer.

Class	Min. Height		XXX
B&B	2 ft. and spread	4 in. Clpr.	\$ 3.90

B&B	7 ft. and spread	20 in. Clpr.	29.00

Palms Used in the Landscape of Southern Estates

Palms are measured and graded by the THICKNESS OR DIAMETER OF THE TRUNK where it protrudes from the ground. From 40 to 60 per cent of the leaves are cut when dug. After new growth starts, fertilize liberally with stable manure and water freely and your Palms will give pleasing results.

Our Palms grow very stocky in the heavy black land, having strongly developed leaves and large, thick, pronounced trunks. More leaves according to caliper than on the palms grown in thick rows.

LATANIA PALM

L. chi. livistona

Fan-leaf variety, rich light green. Good for Tubs for inside use.

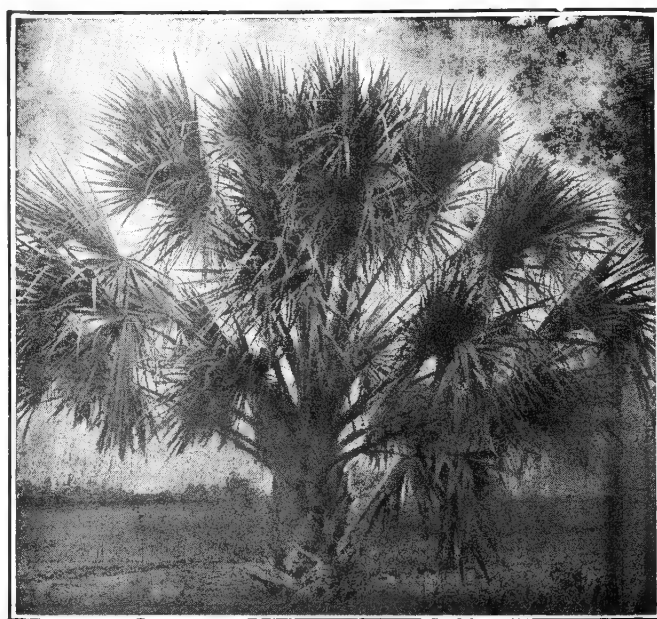

Class	Min. Height		XXX
B&B	15 in.	4- 6 leaves	\$ 2.00
B&B	20 in.	6-10 leaves	3.00

WINDMILL PALMS

Trachycarpus excelsa

Slender trunk with brown filament. Fan-shaped dark green leaves. Very hardy and attractive, rather dwarf in growth.

LIVING MEMORIALS—"TREES"

There is no finer expression of gratitude to those we want to honor, than the planting of a Tree in the home grounds, in Parkways, School Campus grounds, Parks, Avenues, and estates. A tree creates a "Living Memorial" to those to be remembered—those who have sacrificed their lives in preserving a "Free Nation", and those who have given of their time and efforts in the Services, or perhaps other meritorious services performed.

Parkway Memorial Planting which is rapidly taking shape, featuring Sylvester Junipers, Compact Elaeagnus, and Pfitzer Juniper—a lasting result of a Civic Landscape Planting project.

An outstanding booklet—"Living Memorials" as prepared and edited by a Committee of Nationally known Citizens is available, and will be gladly sent upon request. This booklet provides suggestions for individuals and organizations to plan Memorials in the form of City Parks, Play Grounds, Roadside Plantings, Rose Gardens, Arboretums, etc. It will be interesting and helpful in planning for a memorial development.

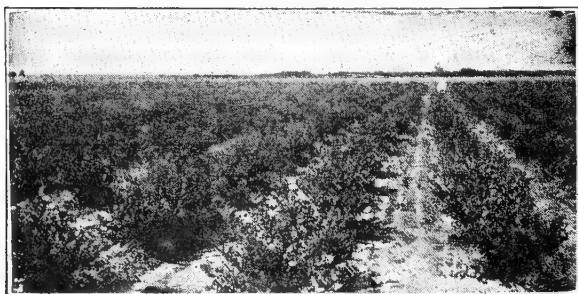

Avenue of Azaleas
A gorgeous sight in full bloom.

GRIFFING'S STANDARDIZED GRADED TREES AND SHRUBS GIVE SATISFACTION!

PRIVET - Ligustrum

PLANT GRIFFING'S LUCIDUM ORIGINATIONS

Acres of Griffing's Waxleaf Privets

PRIVET—Ligustrum

This is a large family with various Shaped leaves, branches and color, etc. Largely used throughout the South. All varieties have masses of white flowers followed with black berries.

BLACKLEAF

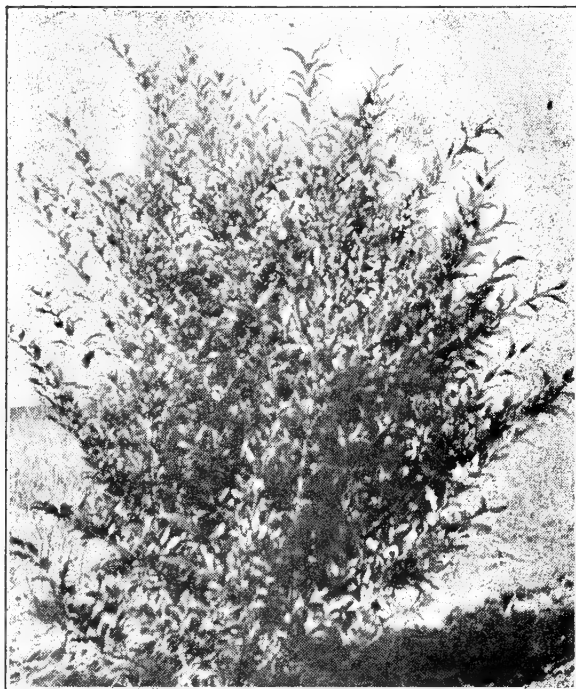

L. lucidum nigrafolium

Distinct Black-green foliage, compact growth. Most hardy of the Ligustrum group; very thick and glossy shrub.

CRINKLYLEAF

L. lucidum recurvifolium

A descriptive name from its twisted or crinkly leaves. Its long upright arching branches with dark green foliage makes it very attractive; much harder than most of the lucidum types.

Crinklyleaf Privet

WAXLEAF, GRIFFING'S

L. lucidum compactum

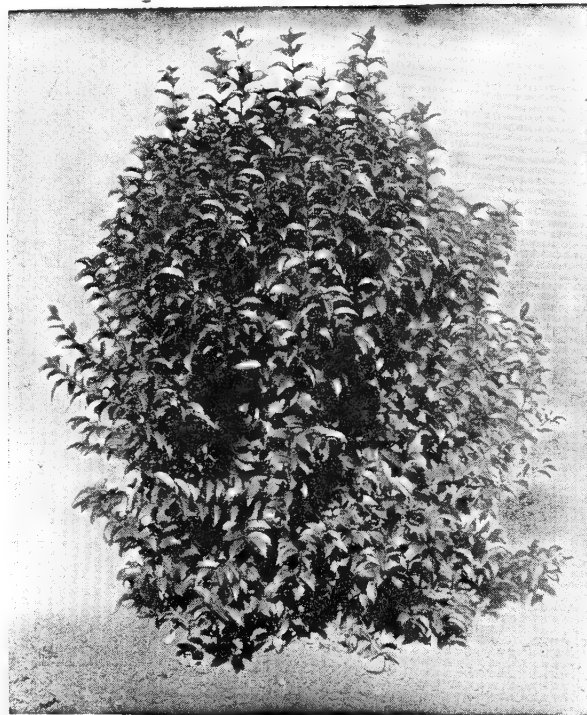

This is the Best bushy compact Evergreen shrub along the Gulf Coast. We have continued propagating from Cuttings this variety from the original plants. Its low compact growing type is decidedly different from a lot of Waxleaf.

Class	Min. Height	XX	XXX
B&B	2 ft.	\$ 1.00	\$ 1.35
B&B	2 1/2 ft.	1.20	1.70
B&B	3 ft.	1.70	2.30
B&B	4 ft.	2.30	3.50
B&B	5 ft.	3.50	5.50
B&B	6 ft.	5.50	7.80

SPECIMENS 7 ft. up \$10.00 and up.

CUTTING GROWN LIGUSTRUMS BEST

We grow many varieties of the Ligustrum, varying in foliage and manner of growth. All these shrubs are grown from original Stock plants by cutting, and are true to name and habit of growth. Our plants are field grown, with good root-system and transplanted B&B, such that they live and give lasting results.

GRACEFUL

L. lucidum gracilis

Branches upright gracefully recurved growth, dark green foliage.

PYRAMID

L. lucidum pyramidalis

Pyramid form, leaves growing upward on the stem. Tall, narrow broadleaved Evergreen.

UPRIGHT

L. lucidum erecta

All branches grow in upright position, otherwise resembling the Waxleaf and often called "Upright Waxleaf".

YELLOWLEAF

L. jap. aureafolium

A tall grower with large yellow leaves.

Class	Min. Height	XX	XXX
B&B	4 ft.	\$ 1.40	\$ 2.00
B&B	5 ft.	2.00	3.00
B&B	6 ft.	3.00	4.00
B&B	7 ft.	4.00	6.00

QUINCE

FLOWERING

Cydonia japonica

Red and Orange. Upright growth, cutting grown stock.

Class	Min. Height	XX	XXX
B&B	2 1/2 ft.	\$ 1.40	\$ 2.00
B&B	3 ft.	2.00	2.90

RED BAY

RED BAY

Persea borbonia

Smooth branches, oblong leaves, glaucous underneath.

Class	Min. Height	XX	XXX
B&B	4 ft.	\$ 1.40	\$ 2.20
B&B	5 ft.	2.20	3.00
B&B	6 ft.	3.00	4.50

REDBUD

Cercis canadensis

Umbrella-shaped top. The Heart-shape leaves appear after the mass of reddish purple flowers in the Early Spring.

Class	Min. Height	XX	XXX
B&B	5 ft.	\$ 1.60	\$ 2.60
B&B	6 ft.	2.60	3.80
B&B	8 ft.	4.00	5.60

SPECIMENS 5 in. Clpr. up at \$16.00 up.

ROSES

We have two varieties to take the place of Ever-blooming Flowering Shrubs to give bright flowers throughout the growing Season, distributed in group plantings, and for hedges or low growing borders.

AZALEA ROSE

Flower clusters much larger than the usual Baby roses, on good strong stems, growing about two feet high. A free and vigorous grower and abundant bloomer. Color a bright Rose-Pink. A group resembles an Azalea planting.

LOUIS PHILIPPE ROSE

The foliage and bush is a very strong bright green. The bush is a very strong upright grower of bushy habit and with bright red flowers, hanging in clusters over the bush at all Seasons of the year, it is one of the best flowering long-life shrubs that can be planted.

Class	Min. Height	XX	XXX
B&B	Strong 2 yr., each	\$ 1.25	
B&B	Extra Strong 3 yr., each	1.75	

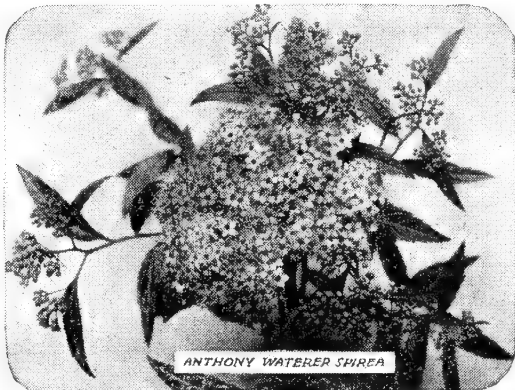

SPIREA

ANTHONY WATERER

Spirea anthony waterer

Small growing, compact growth, pink flowers.

Class	Min. Height	XX	XXX
B&B	18 in.	\$ 1.20	\$ 1.60
B&B	2 ft.	1.60	2.00

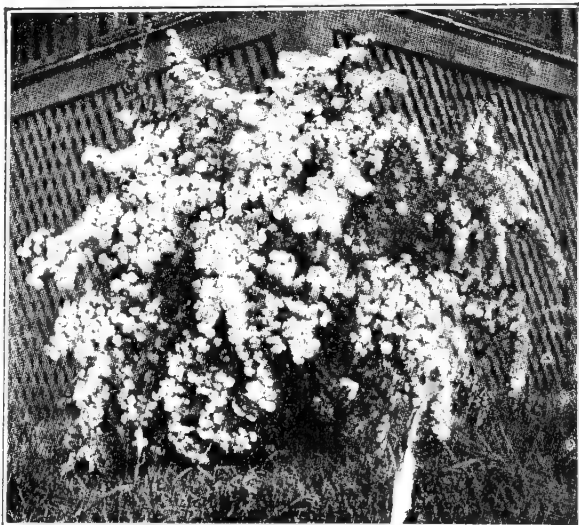

DOUBLE REEVES SPIREA

S. reevesiana plena

Semi-upright shrub, arching branches. Very double white flowers in masses in Spring season.

Class	Min. Height	XX	XXX
B&B	2 ft.	\$.90	\$ 1.25
B&B	3 ft.	1.25	1.75
B&B	4 ft.	1.75	2.50

NB at 25% off B&B prices.

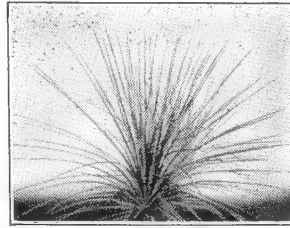

Double Reeves Spirea In Full Bloom.

THUNBERGI

Spirea thunbergi

Semi-spreading habit; arching branches. Delicate tiny fresh green leaves. In the Spring, small button-like white flowers appear, followed by new lacy green foliage.

Class	Min. Height	XX	XXX
B&B	4 ft.	\$ 1.50	\$ 2.00
B&B	5 ft.	2.00	2.75

SOTOL

TALLOW TREES

SOTOL

SAWTOOTH

Dasyliirion serratifolium

Long tapering leaves gracefully recurved with sawtooth edges.

Class	Min. Spread	XXX
B&B	2 ft.	\$ 2.00
B&B	3 ft.	3.00

Simon Elaeagnus Hedge in foreground with weeping willow in Background.

SKYFLOWER

Duranta plumeri

Green foliage; flowers in clusters of lilac color followed by yellow berries in clusters.

Class	Min. Height	XX
B&B	3 ft.	\$ 1.75
B&B	4 ft.	2.50

SYCAMORE

(Plane Tree)

Platanus orientalis

A tall, wide spreading tree. Leaves are very large, usually five lobed.

Class	Min. Height	XX	XXX
B&B	10 ft. 2 in. Clpr.	\$ 2.80	\$ 4.00
B&B	12 ft. 2½ in. Clpr.	4.00	5.50

It is a HOME when it's PLANTED!

CULTURAL SUGGESTIONS FOR GARDENING

Griffing's best methods for Planting and Care of Trees and Shrubbery for best results, after years of experience in replanting of all size and classes of plant materials. These suggestions are given in an effort to help our Customers have the best success in planting out the materials we supply them—as Satisfied Customers bring return business back to you.

PROPER CARE OF B&B TREES AND SHRUBS

When Customers receive shipments of Griffing's B&B Trees and Shrubbery, the best method for care of this material until it is replanted is to keep it well watered. To do this, we recommended that the balls be set in water in the shade and allowed to soak up thoroughly. The soil does not melt down when wet, as it is heavy. Keep well watered in this manner until it is replanted in the ground.

PLANTING B&B TREES & SHRUBS

Griffing's Trees and Shrubs require a somewhat different method of planting if they give the satisfying results after they are in the ground. If these few precautions are followed, you'll have the same success in plantings as we do, with 100% Results!

In planting in the Gulf Coast Area, dig the hole only as deep as the ball itself. Set the ball in the hole on level hard bottom, leave the burlap (and wire) on the balls, and after they are fully soaked, set the tree in the hole upright and turned for the best effects, in the locations used.

Next, spade in the sides of the hole around the plant out to a distance of three or four feet, letting the soil spaded fall into the hole around the tree. Spade up and pulverize this soil to a depth of 12 inches or more, pressing the dirt next to the ball. You will have enough soil to cover the top of the ball and the hole in which it is planted.

FINISHING OFF THE PLANTING JOB

Your Tree is just partly planted at this point. Use the soil thrown out of the hole, to make a ridge or basin rim 6 to 8 inches high around the outer edge of the spaded area, which will hold plenty of water afterwards.

Water the Tree before you finish—Push the hose down beside the ball and let it run until the basin is filled. This will fill in all the air spaces and settle the soil firmly.

MULCH AROUND THE NEWLY PLANTED TREES

After the water has soaked away once or twice and soil is replaced to a smooth level, mulch the top surface of the tree with a bushel of stable manure and settle in place with more water.

PRUNING AND CARE OF SHRUBS

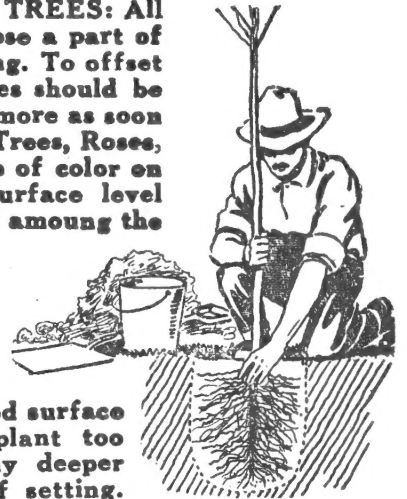

PRUNING: Most Evergreens, including Broadleaf and Coniferous types, as well as Fruit Trees and some Flowering Shrubs should be pruned during the dormant period. If you wish to retain the natural appearance of Shrubs, so they will not out-grow their positions, they should be reshaped by cutting off the long "shoots" inside the natural edge of the specimen, and not cut uniform to make formal plants of them. Some Flowering Shrubs, which bloom only early in the spring should be pruned after the blooming period to have blooms the following spring, as these types produce their blooms on the past season's growth.

SPRAYING: Certain Plant Materials require spraying for the most prevalent types of insect and fungus.

KEEP BASIN & MULCH AROUND TREES

Newly planted trees need water and fertilizer, and cultivation, so keep this basin around your trees for a year or more to facilitate cultivation, and watering. Do not let the trees become dry—water thoroughly when you water but not more often than twice weekly. Do not allow lawn grasses to cover the planting space of newly planted trees.

HOW TO PLANT N-B TREES: All NB (Bare Root) Trees lose a part of their roots in transplanting. To offset the root loss, the branches should be pruned back half way or more as soon as planted. To plant NB Trees, Roses, etc. you will see a change of color on the trunks where the surface level should be. Fill in fine soil among the roots, placing the roots carefully in the position they should grow. Follow the same instructions as for Planting B&B Trees.

DRAINAGE: Have good surface drainage, and do not plant too deep. Don't dig hole any deeper than the ball because of setting.

FERTILIZING: Do NOT use any fertilizer in the hole when planting unless it is a small amount of bone meal for each plant. In most soils, renewed strength in the way of dairy manure for plant food should be applied at least once a year, usually during the winter. The application of well-rotted and pulverized dairy manure will make the beds more pliable and allow for cultivation of same more rapid and readily after much rainfall. Commercial fertilizers are satisfactory to use in small quantities during the growing season.

CULTIVATION: All types of Planting Materials require systematic cultivation. After Shrubs have been planted and the beds are put in good condition by working and fertilizing, we recommend that the surface of the beds be stirred to a depth of two or three inches and maintain a mulch. A pronged fork is one of the best Garden tools to use in breaking the crust which will form on the beds after each application of water or rain.

HOW TO WATER TREES AND SHRUBS: To water newly planted Trees and Shrubs, push the end of the hose down beside the ball and let water run until the basin is full. This will fill all air spaces. Repeat every week if needed to keep soil moistened. Mulch with rough straw or lawn clippings mixed with stable manure.

The most common enemies of the Coniferous Evergreens are Blight, Bag worms, and Red Spider.

For all CHEWING OR FOLIAGE eating insects, a stomach poison must be applied to the foliage. Use ARSENATE OF LEAD.

For such insects as Red Spider, or any of the similar ones which draw the sap from the foliage SULPHUR should be applied.

For PLANT LICE AND APHIDS, nicotine sulphate should be applied.

For MILDEW OR FUNGUS DISEASE, such as Black-spot, leaf blights, etc., use Bordeaux Mixture.

For SCALE INSECTS and WHITE FLY, spray with lime sulphur if trees are dormant. For Summer spray or for Evergreens, use an oil EMULSION.

HIGHEST QUALITY FOR RESULTS

Since 1886 when we first began to grow and offer selections of Shrubbery, Shade Trees and Fruits to the public, we have tried continuously to produce and offer the highest quality selections of quality and varieties we could. Based on this practice of doing business, we have built our business on the foundation of "High Quality and Good Stock," and satisfied customers.

We take pride in serving our customers by furnishing high quality, true to variety, and good hardy field grown stock that we know will give results when transplanted and given a reasonable amount of care and attention. Today it is a real pleasure to point out the Home Grounds and Orchards throughout the Southwest, where our selections of Trees and Shrubbery has played such an important part in their development.

A NURSERY WITH A BACKGROUND

Since the beginning of our small Nursery over sixty years ago, in Northern Florida we have come a long way, and we strive to continue our improvements in the Plant Field for the betterment of the Public throughout the territory we serve.

Always, the Griffings have grown their Nursery stock offered to their Customers, and offered the best of the items sold. They are ever alert to secure and offer new and improved selections to their Trade, and it is only after full experiments are made that they recommend the selections for general use.

We pride ourselves in offering only Standardized Graded Plant Material, which has been properly grown, pruned, sprayed, cultivated and prepared for shipment when ready for the market. Our selection of proper soil means much to the results on plants we sell. With a good root system, properly dug B&B (Balled & Burlapped) our plants will live and grow after they reach the Customer; and you can count on Griffing's Trees and Shrubbery being true to name after they are sold and grow into maturity.

EXPERTS IN OUR LINE

The growing of Nursery Stock is a **HIGHLY SPECIALIZED BUSINESS** requiring an exact knowledge of Plants and **HORTICULTURAL** and scientific methods. After over **SIXTY YEARS** of successful growing we can without boasting, claim to be **EXPERTS** in our line. Our standards are of the highest.

Our field work is under the **SUPERVISION** of experienced Foremen, and they give our customers the benefit of their **EXPERT KNOWLEDGE** of how to **GROW, DIG and SHIP** our Nursery Stock.

EXPERIENCE COUNTS

Our plants are the finest that can be produced. **OUR EXPERIENCE** enables us to offer you a **VALUABLE** and practical **SERVICE** in **SELECTING, Planting, and caring** for plants. We can and we are certain, from the **EXPERIENCE OF YEARS**, that you will find it pleasant and profitable to deal with us.

LANDSCAPING AN INVESTMENT

We have **YET TO MEET** the owner who ever regretted an **INVESTMENT**—where he had **UNDERTAKEN** this improvement under the competent advice and **DEALT DIRECT** with reliable, established Growers. Even one great towering Shade Tree—what a restful **DELIGHT IT IS!** Worth hundreds of dollars. Yet not impossible to purchase by simply **PLANNING FOR IT.**

THE IMPORTANCE OF LANDSCAPE

The aim of Landscape Design is to produce the **MAXIMUM OF BEAUTY** consistent with utility. To attain **THIS RESULT**, it is usually best to secure **THE SERVICES** of a Landscape Architect, whose assistance will not only serve to **AVOID ERRORS** but will also save **EXPENSE AND TIME.**

LANDSCAPE PLANTING

A **WELL-LANDSCAPED** dwelling gives out a perpetual smile. Winter and summer alike—to its owner's family, and every passing stranger—it radiates quiet, **JOY, refinement.**

IT NEED NOT BE a large elaborate dwelling: A cottage, even more than a castle, needs a **BECOMING SETTING.** Neither is much room needed. On the contrary, never is the Landscape Architect's touch more wonderful—or needed—than in making the utmost of a **NARROW OR SHALLOW LOT.**

YEAR 'ROUND PLANTING OF EVERGREENS

Many Nurserymen will refuse to transplant Trees and Shrubs during the late Spring and Summer months. Due to the fact that we have particular kind of soil especially adapted for Balling Trees and Shrubs and our methods of Root Pruning, we are able to move Trees and Shrubs, at any season of the year without the loss of small branches or even leaves. Our experience has taught us that by the use of our Trees and Shrubs, planting can be done in the Summer as well or even better than during the Fall and Winter.

HEADQUARTERS FOR LIVE OAKS, MAGNOLIA, CRAPE MYRTLE, ELAEAGNUS, HOLLY, GARDENIAS, LIGUSTRUMS, AZALEAS, PALMS, VIBURNUM, JUNIPERS, AND GENERAL ASSORTMENT OF LANDSCAPE MATERIALS FOR THE SOUTH!

We specialize in Field Grown Evergreen Shade Trees, and Broadleaf and Coniferous Evergreen, all used extensively in the Landscape Plantings in the Southwest. Our Stock of each variety we offer is in sufficient Quantity to fill most any size order in the size and Quality our Customers desire.

We invite you to look over our Catalog Listings, and our Nurseries in connection with your requirements in Good Quality Trees and Shrubbery, for the most exacting plantings. We may not handle the most plants, but we pride ourselves in handling only the **BEST.**
